AI READINESS MODEL

AIDirections is proud to offer the AI Readiness Model to our customers, in self-service, or assisted by AIDirections.
INTRODUCTION
Experience has shown that it is necessary to have digital transformation and data governance in place in order to make AI projects successful. The AI Readiness Model was developed to ensure the necessary prerequisites are in place.

APPLICATION:
The AI Readiness Model checks the amount of:
- Digital Transformation - Digital transformation refers to the changes associated with the application of digital technology in all aspects of an organization.
- Data Governance – data governance is the management of all data an organization has to ensure that high quality exists throughout its complete lifecycle.
- AI Readiness – the AI readiness of an organization is the ability and intend to develop, establish, and implement a set of processes for the successful use of AI.

ADVANTAGES OF THE AI READINESS MODEL:
- Based on well-established maturity models for digital transformation and data governance.
- Can be completed by any organization planning to apply AI.
- Web-based and applicable anywhere.
- Provides enablers for each area checked that can be used to improve the current state.
- Provides a full editable report, including all results and enablers.
