Al Yousuf Robotics – The leading edge Division from Al Yousuf LLC

Al Yousuf LLC, a home-grown global conglomerate, is further expanding to include an exclusive Robotics Division. This division will work on developing and promoting smart robotic systems for varied Commercial, Industrial and Household purposes, engaged in creating utilities that amplify human life. Al Yousuf Robotics falls under Al Yousuf Smart Solutions.

Spanning a journey of over 65 years, Al Yousuf LLC continually strives to exceed customer expectations through constant innovations and improvements. Staying true to its mission, the Robotics division aims to deliver excellence and scale new heights. Al Yousuf Robotics division has been broadly divided into two categories - industrial and retail. The industrial fleet consists of Avidbots – NEO Autonomous Navigation Technology Robotic Floor Scrubber from Canada with integrated technology which is capable of operating in any commercial floor space with quality cleaning and reporting. NEO Floor Scrubbing Robot is planned to launch in UAE University – Al Ain along with the Facilities Management partner Berkeley Services on 12, April 2018. The retail & home fleet includes Hobot for Glass Cleaning and U–Bot for floor cleaning. These cleaner robots are well-equipped with the latest technology and sensors to provide high-end cleaning services and save time as well as cut down on expenses.

The robotics and automation market in the Middle East is expected to see increased investments as United Arab Emirates steers its way to become the region’s robotics hub. According to a report by International Data Corporation, global spending on robotics and drones is expected to grow 22.1% year-on-year to reach $103 billion in 2018. The report also says the spending will become more than double to $218.4 billion by 2021. Robotics spending will account for over 90% of all spending between 2017 and 2021; it can also raise global employment by 10% by the year 2022. In addition, a report by International Federation of Robotics confirmed that the global demand for industrial robots reached an all-time-high of about 354,000 units in 2017.

Al Yousuf Robotics is the first registered Robotic Operations Company in UAE.

Mr. Tamim Khaled Yousef, Division Head of Al Yousuf Robotics said, “As the industry expands, Robotics is offering novel growth prospects on a global scale and we’ve taken up this opportunity for our company to invest, innovate and drive advancement in the technologies of tomorrow. Al Yousuf LLC is delighted to introduce our exclusive robotics division to the UAE market. We have plenty of surprises planned out to make the most of the emergent market in robotics and this is just the start.”

About Al Yousuf LLC:
Al Yousuf Group was founded 65 years ago by Mr. Yousuf Habib Al Yousuf who had a vision to make the company grow to be at the top in business. Al Yousuf started operations with the successful sale of shipment of rice imported from India and has grown to a multi-million dirham conglomerate.

Over the years, Al Yousuf LLC has explored different markets with no fear of challenge. Empowered by passion, the company has successfully been able to maintain and gain international brands to be in the UAE market.
